1 Information

1.1 Information about this operating manual

The operating instructions are part of the Interroll product(s) mentioned in the title and contain important notes and information on the various operating phases of the product(s) mentioned.

Like all our products, the operating instructions are also subject to constant monitoring and will be adjusted if necessary.

The currently applicable version of this operating manual can be found online at:

www.interroll.com

All the information and advice in this operating manual has been compiled with respect to applicable standards and regulations as well as the current state of the art.

- To ensure safe and faultless operation and to fulfil any warranty claims that may apply, read this operating manual first and observe its instructions.
- Keep this operating manual within close reach of the DriveControl.
- Pass this operating manual onto every subsequent owner or user.

The manufacturer assumes no liability for damage and malfunctions that occur as a result of non-compliance with this operating manual.

Should you still have any unanswered questions after reading this operating manual, please contact Interroll customer service. Contact details for your region can be found online at www.interroll.com

Please direct any comments and suggestions regarding our operating manuals to manuals@interroll.com

Information

1.2 Warning notices in this document

Warning notices are provided in the context in which danger can occur and describe the nature of the danger in question. They are structured according to the following examples:

SIGNAL WORD

Type and source of hazard

Consequence(s) in the event of non-compliance

- Measure(s) for avoiding hazard
-

Signal words indicate the type and severity of the consequences if measures to avoid the hazard are not observed.

DANGER

Denotes an imminent hazard.

If measures to avoid the hazard are not observed, death or severe injury will occur.

- Preventive measures
-

WARNING

Denotes a potentially hazardous situation.

If measures to avoid the hazard are not observed, death or severe injury may occur.

- Preventive measures
-

CAUTION

Denotes the possibility of a hazardous situation.

If measures to avoid the hazard are not observed, minor or moderate injury may occur.

- Preventive measures
-

NOTE

Denotes a situation that can lead to material damage.

- Preventive measures
-

1.3 Symbols

This symbol indicates useful and important information.

- ✓ This symbol indicates a requirement that must be fulfilled before carrying out assembly or repair work.

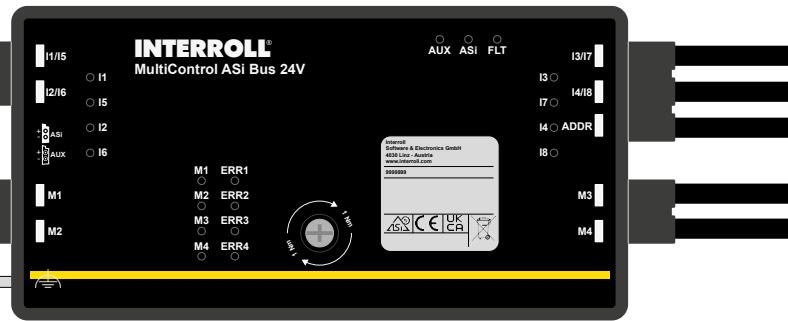

This symbol indicates general information relating to safety.

- This symbol indicates an action that needs to be performed.
- This symbol indicates a listed item.

Interroll MultiControl ASi Bus 24 V / 48 V

2 Interroll MultiControl ASi Bus 24 V / 48 V

Read instruction:

Before working with this unit: read these instructions carefully and completely. All notes on safety and specifications of the device manual and the manual for the configuration software are to be considered!

2.1 Safety notes

Professional installation:

Electrical installation is to be performed by qualified personnel. During installation, make sure that supply and signal cables and also the ASi bus cable are laid separately from high-voltage cables. In the switching cabinet, it must be ensured that appropriate spark extinction equipment is used for contactors. If drive motors and brakes are used, observe the installation instructions in the corresponding operating manual. Please note that the maximum cable length of the ASi bus cable is 100 m. Cable lengths longer than this require the use of suitable cable extensions.

WARNUNG

HAZARDOUS VOLTAGE!

- Before any installation, maintenance or modification work: Disconnect your system from the supply network. Ensure that it cannot be reconnected inadvertently!

Short circuits between the pins of the motor socket can lead to a device defect!

Observe operating voltage!

48 VDC must not be connected to

- Devices with 24 VDC operating voltage (observe data sheet of the manufacturer)
- the ASi connection of the device
- the ASi gateway!

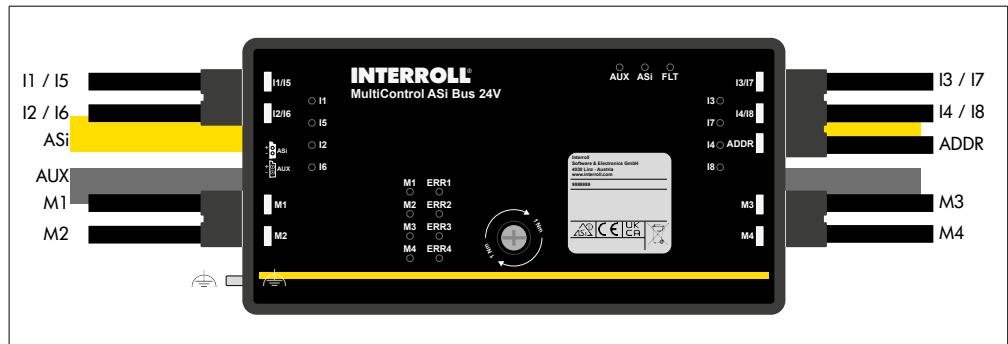

Interroll MultiControl ASi Bus 24 V / 48 V

2.2 Technical specifications

General	
Motor rollers	4 x Interroll (EC5000 AI, 24 V / 48 V, 20 W / 35 W / 50 W)
ASi	
Address	1 ASi-5
Required ASi specification of the master	ASi-5
Rated operational voltage	30 V (18 ... 31,6 V)
Max. current consumption	320 mA
Max. current consumption without sensor/actuator supply	80 mA
AUX	
Voltage	24 V (18 ... 30 V) 48 V (45 ... 51 V)
Protection rate	IP54
Can be used with passively safe-switched AUX cable up to SIL3/PLe	Yes
Ambient temperature in operation	-30 °C ... +70 °C
Ambient temperature during transport and storage	-25 °C ... +85 °C
Altitude of installation site	Max. 2000 m

Interroll MultiControl ASi Bus 24 V / 48 V

2.3 Front view and connections

Connections

1	24 V out of ASi
2	I5 - I8
3	0 V out of ASi
4	I1 - I4

Connections

1	24 V / 48 V ext. out
2	CW M1 - M4
3	0 V ext. out
4	Error M1 - M4
5	Speed M1 - M4

Connections

Interroll MultiControl ASi Bus 24 V / 48 V

Signal	Description
24 V out of ASi	Power supply, out of ASi, positive pole (sensor supply)
0 V out of ASi	Power supply, out of ASi, negative pole (sensor supply)
I _x	Digital input x
24 V ext out	Power supply, out of external voltage, positive pole (AUX)
0 V ext out	power supply, out of external voltage, negative pole (AUX)
CW M _x (clockwise)	Direction of rotation of motor x
Error M _x	Error at the motor x
Speed M _x	Speed of the motor x
ASi	ASi profile cable for data and power transmission
AUX	ASi profile cable for additional auxiliary power

Interroll MultiControl ASi Bus 24 V / 48 V

2.4 LED status indicator

LED	Description
ASi / FLT	  ASi voltage on
	  Address „000“
	  See Peripheral fault
	  Flashing pattern for identification of the device (e.g. can be activated from ASIMON360)
	  Warning message, see diagnostics software for further details
	  Firmware update is running
I1 ... Ix	 Status of inputs
AUX	 External supply voltage on
M1 ... Mn	 State of motor outputs
	 Motor fuse is blown out
ERR1 ... ERRn	 Error message motor or motor not connected to module
	 ERR LED is not controlled when the motor ports are deactivated

Explanation

	Alternate flashing
	Simultaneous flashing
	LED Off
	LED On

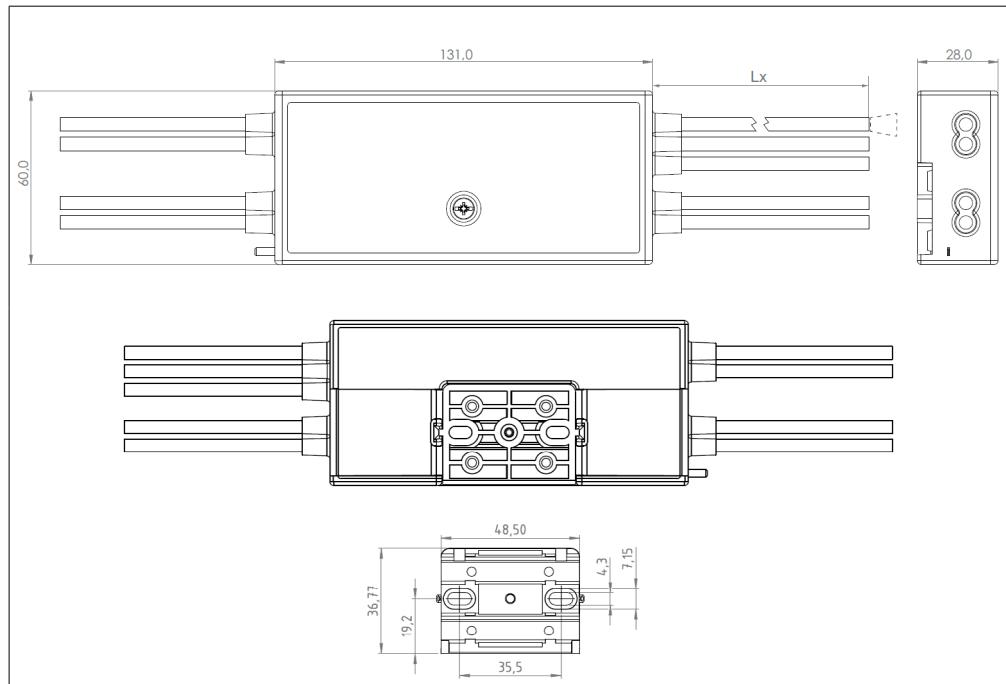

Interroll MultiControl ASi Bus 24 V / 48 V

Peripheral fault

- Overload output
- AUX voltage is missing
- Overload sensor supply
- Motor fuse blown or motor in fault condition or not connected to the module

Interroll MultiControl ASi Bus 24 V / 48 V

2.6 Dimensions

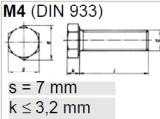

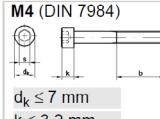

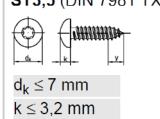

Interroll MultiControl ASi Bus 24 V / 48 V

2.7 Montage

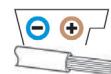

Mounting types

On ASi substructure module

<p>angetriebene Mutter // driven nut// écrou entraîné // dado azionato // tuerca accionada</p> <p>M4 (DIN 933)</p>  <p>$s = 7 \text{ mm}$ $k \leq 3,2 \text{ mm}$</p> 	<p>angetriebener Schraubenkopf // driven screwhead // tête de vis entraîné // testa del bullone azionato // cabeza del tornillo accionada</p> <p>M4 (DIN 7984)</p>  <p>$dk \leq 7 \text{ mm}$ $k \leq 3,2 \text{ mm}$</p> <p>ST3,5 (DIN 7981 TX)</p>  <p>$dk \leq 7 \text{ mm}$ $k \leq 3,2 \text{ mm}$</p> 
--	---

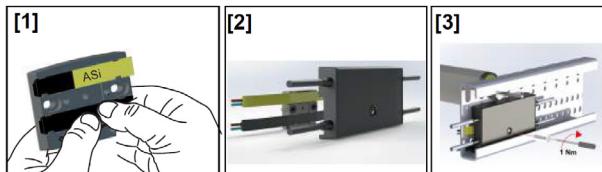

Use copper conductors only!

CAUTION

Risk of stab wound!

- The housing includes sharp parts - handle with care!

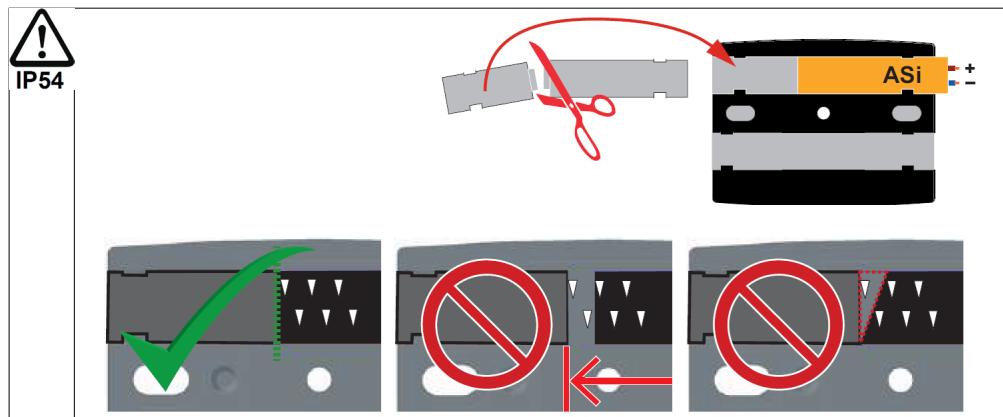

NOTE

Verify functionality correct placement of the gaskets!

Avoid direct sunlight.

2.8 Line termination with sealing profiles

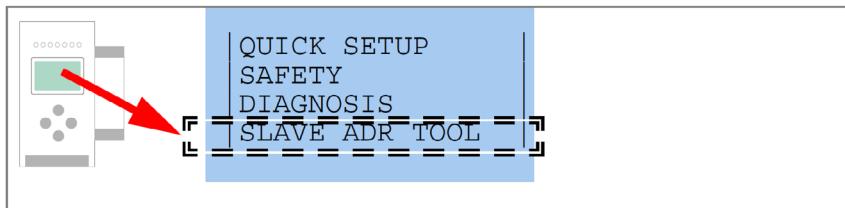

To improve interference resistance, it is recommended to connect the ground connection of the module to the system ground via a suitable flat plug sleeve (2.8 mm x 0.8 mm).

Interroll MultiControl ASi Bus 24 V / 48 V

2.9 Addressing with ASi Master and ASIMON

The addressing of the device can be set via the display menu. For further information, please refer to the documentation of the gateway.

Addressing is possible also with hand addressing devices.

All addresses of the device can be set via ASIMON360 / ASi Control Tools360. For further information, please refer to the documentation.

Interroll MultiControl ASi Bus 24 V / 48 V

2.11 Translation of the original Declaration of conformity

EU Declaration of conformity

EMC Directive 2014/30/EU

RoHS Directive 2011/65/EU

The manufacturer

Interroll Software & Electronics GmbH
Im Südpark 183
4030 Linz
AUSTRIA

hereby declares that the

- Interroll MultiControl ASi Bus 24V**

conforms to the applicable provisions and the associated CE marking in accordance with the aforementioned Directives.

List of the coordinated standards that have been applied:

EN 62026-2:2013
EN 61000-6-2:2005/AC:2005
EN 61000-6-4:2007/A1:2011
EN 61131-2:2007
EN IEC 63000:2018

Authorised for compiling technical documentation:

Interroll Software & Electronics GmbH, Im Südpark 183, 4030 Linz
